PROFILE

Data-driven professional and Team Leader at Waitrose & Partners (John Lewis Partnership) with an MSc in Data Mining and Warehousing, a BSc in Computer Science, and a **Level 3 Data Insights for Business Decision apprenticeship completed with Merit (Multiverse / John Lewis Partnership)**. Delivered eight end-to-end analytics projects covering sales analysis, customer behaviour, data validation, forecasting and operational efficiency. Proficient in **Power BI, Tableau, SQL, Python and Excel**, with a track record of turning complex data into clear, actionable recommendations that reduce waste and improve customer satisfaction. Combines technical capability with frontline retail leadership to bridge the gap between analysis and business decision-making.

TECHNICAL SKILLS

Data Analysis & Visualisation

- Power BI (DAX, interactive dashboards, slicers, KPI cards), Tableau, Power Query, Power Automate
- Excel (pivot tables, advanced functions, data validation, Power Query ETL)
- Python (data manipulation and analysis)
- SQL

Data Management & Quality

- Data cleaning, validation and quality assurance; ETL processes; data modelling; normalisation
- Statistical analysis and data mining: classification, regression, clustering, association rule mining
- SAS; data warehousing concepts; GDPR and UK Data Protection Act 2018 compliance

Business & Communication

- Stakeholder analysis and tailored communication; data storytelling and presentation
- ROI analysis and business case development; change management (ADKAR, Six Sources of Influence)
- Agile/Scrum (sprint planning, reviews, retrospectives); cross-functional collaboration

DATA ANALYTICS EXPERIENCE

Data Insights & Business Decision Apprenticeship — Multiverse / John Lewis Partnership
Level 3 | Completed with Merit | 2025 – 2026

Completed eight business analytics projects using the STAR methodology, applying Power BI, Tableau, SQL, Python, Excel and Power Query to real operational problems.

- Built an interactive **JLP Superstore Sales Performance Dashboard** (Power BI) consolidating 2,800+ orders across 80+ product lines; identified a potential **£2,500–£3,500 annual profit uplift** and reduced reporting time from 10+ hours to under 1 hour per week.

- Designed and executed a **data validation and cleaning pipeline** (Power Query), resolving mixed date formats, missing fields and duplicate records; documented 11 validation rules and cut analyst rework from 2 to 3 hours to under 1 hour per project.

- Developed an **automated data quality monitoring workflow** using Power Automate, with email/Teams alerts and an audit trail, preventing errors before they reach analysis.
- Led a **change initiative** embedding data-driven decision-making into daily shift handovers ("Data Minute"), achieving a **10% reduction in fresh food waste within four weeks**, 85% team participation, and a **9.7% improvement in customer satisfaction scores**.
- Analysed customer satisfaction and operational dashboards to identify root causes of dissatisfaction across checkout speed, partner availability and product availability; presented prioritised recommendations to Branch and Line Managers.
- Presented findings and business impact through stakeholder-tailored slide decks, emails and live dashboard demonstrations; received a formal commendation from the Branch Manager for quality of work.

PROFESSIONAL EXPERIENCE

Team Leader — Waitrose & Partners (John Lewis Partnership)
2022 – Present | (Previously Supermarket Assistant, 2006 – 2022)

- Lead a team across customer service, replenishment, stock management and the On-Demand Grocery (ODG) online service, with responsibility for customer satisfaction, sales growth and operational efficiency.
- Use Tableau dashboards and operational reports (sales volume, FPWS, availability, compliance) to inform daily resourcing and stock decisions.
- Applied analytics to diagnose ODG fulfilment issues — identified peak order windows through heatmap analysis and introduced Higher Level Shelving (HLS) replenishment routines, driving a sharp reduction in Failed Picks With Stock (FPWS).
- Introduced a "Data Minute" review into shift handovers and trained two Data Champions to sustain the practice, embedding data literacy into daily operations.
- Deliver end-shift handovers and performance updates to management and peers through written reports and team meetings.
- Provided consistently high customer service in a fast-paced retail environment, resolving queries and complaints with tact and diplomacy.

Graduate Developer (Pentana Compliance Software) — Ideagen plc.
August 2015 – 2020

- Designed and delivered customised data reports for clients using Pentana's reporting and data extraction tools, tailoring output to each organisation's audit, risk, and compliance requirements.
- Built and maintained report templates and dashboards, translating stakeholder requirements into accurate, repeatable reporting solutions.
- Extracted, transformed, and validated data from Pentana's underlying databases (e.g., SQL) to support bespoke reporting and analysis.
- Analysed large datasets to identify trends, exceptions, and anomalies, presenting findings in clear, decision-ready formats for senior stakeholders.
- Collaborated with clients and internal teams to gather reporting requirements, define specifications, and iterate on deliverables through to sign-off.
- Automated recurring reporting processes, reducing manual effort and improving accuracy and turnaround times.

- Performed data quality checks and reconciliations to ensure integrity and consistency across customised reports.
- Documented report logic and specifications, and provided training/support to end users on report usage.

EDUCATION

Level 3 Apprenticeship Data Insights for Business Decisions
Multiverse / John Lewis Partnership | 2025-2026

MSc in Data Mining and Warehousing
London Metropolitan University | 2007 – 2008

BSc(Hons) in Computer Science
University of Hertfordshire | 2003 – 2006

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
